The Welcome.

Come in the evening, or come in the morning,
Come when you're looked for, or come without warning,
Kisses and welcome you'll find here before you!

And the oftener you come here, the more I'll adore you!

Light is my heart since the day we were plighted,
Red is my cheek that they told me was blighted;
The green of the trees looks far greener than ever,
And the linnets are singing, "true lovers! don't sever." NOTICE.

## Abel Hucks in a Tight Place. BY THE AUTHOR OF "COUSIN SALLY DILLIARD.

MONROE, Union Co., N. C., July 4th, 1851. Mister Porter :- I wishes to lay a case before you that I thinks is hard. You see I was born a poor man; and luck has been agin me ever sense I was born; and what's worse, the law has been agin me. too. I mout have stole several times, and not been found out, but that's agin my principles. I don't see how them as gits rich by stealing can enjoy their riches —I couldnt do it, and so I wouldnt steal. I mout have lugged and loafed about as some does, but I'm above that, too; for I has suffered some in this world, and I allows I shall suffer some more before I'll ei-ther steal or lug. But that's not to the pint—or rather steal or lug. But that's not to the pint—or ra-ther to the half-pint: for the worst pint in my case was a half-pint to begin with. I spose I had drunk about that quantity of the ardent, when who should come along but "Forty foot Houston." Now, Mr. P., it so happens that I am a low man in inches. and I can't bear for one of those tall fellows to be look-

ing over my head at something beyond me. Ses I:

"Mr. Houston, look some other course."

Ses he: "What's the matter, Hucks?"

Ses I: "I don't wan't you to be standin' thar a

"Why," says he, "Hucks. you are a fool!"
That was enuff: I had allers wanted to hit a tall

The London Times on America. The following. from the London Times, of Sept. 2d, is in rather a different tone from that exhibited by

goodness of heart, I'll make the offer to my competitor. I am sure of being elected, and he will lose something by the canvass—therefore I am willing to divide equally with him, and make these two offers. I'll take the salary, and he may have the honor; or he may have the honor, and I'll take the salary. In the way of honors I have received enough to satisfy me for life. I went out to Mexico, eat pork and beans—slept in the rain and mud, and swallow, which did not turn out a failure, which exceeded expendences in rather a different tone from that exhibited by the Times a few months ago:

Taking all things together, British and Americans have run a pretty fair tie through the trials of this wonderful season. The spring, it must be confessed, opened ill for Brother Jonathan, and for a good while in the race we kept well ahead. We had our great exhibition,—a real new "smart" speculation, which did not turn out a failure, which exceeded exery body's hopes, and which brought about no revo-lutions at all. It was calculated that we should reabreak for the chapparal, you had better believe I lize \$2,000,000, whereas we have got over \$2.100,000

On the other hand, it is beyond all denial that ev-ery practical success of the season belongs to the Americans. Their consignments showed poorly at first, but came out well upon trial. Their reaping machine has carried conviction to the heart of the British agriculturist. Their revolvers threaten to revolutionize military tactics as completely as the work all the time with his nose down upon the public grindstone. Four years must have ground it to a pint. Poor fellow, the public ought not to insist on having the handle of his mug ground elean off. I have a large, full-grown and well-blown nose, red as a beet and tough as sole leather. I rush to the post of duty. I offer it up as a sacrifice. I clap it on the none other next to him. "What's first?"—"The America." "What's second?"—"Nothing." Be-america." "What's second?"—"Nothing." Be-america." "What's second?"—"Nothing." sides this, the Baltic, one of Collins' line of stenmers, has "made the fastest passage yet known across the Atlantic," and, according to the American journals, has been purchased by British agents "for the purpose of towing the Canard vessels from one shore of the ocean to the other."

Finally, as if to crown the triumphs of the year. Americans have actually sailed through the isthmus connecting the two continents of the New World, and, am sure to be elected, so one and all great and small, short and tall, when you come down to Jacksmall, short and tall, when you come down to Jackwe think on the whole, that we may afford to shake hands and exchange congratulations, after which we must learn as much from each other as we can. As for yachts, we have no doubt that by next August every vessel of the Cowes squadron will be trimmed to the very image of the America : there is no doubt that our farmers will reap by machinery, and the revolver, we fear, is too attractive an embodiment of personal power to be overlooked by European mis-chief-makers. We trust however, that we may bor-

He was no doubt perfectly familiar with the bill which was sent to him for his concurrence, and it would not have taken him more than one minute to sign it; and he acknowledges in his speech that he did sign others after the one in question was received by him, but they were trifling and unimportant, and local in their character, and did not, therefore, require the deep study, the laborious examination, the intense and exeruciating consideration which were involved in the anti-Abolition bill! Arrival of Gen. Lane.

Gen. Lane, delegate elect to Congress from Oregon and late Governor of that territory, arrived here yes-terday from his new home on the Pacific, preparatory to taking his seat for the National Legislature. We welcome the faithful servant of the republic, the "Ma rion" of the Mexican war, back among his old friends and admirers, and doubt not that here and every wher else on the road to his former home in Indiana-where we learn, he proposes sojourning until Congress sits-his presence will be hailed with delight by the people which they were accomplished. We are free to say that with the exception of Buena Vista alone—where he was an actor—the great disparity of force he fought against in several instances, had no parallel during the

After the capture of the city of Mexico it was his in-defatigable pursuit of Rea, Jarauta and Santa Anna that demolished, so speedily, the remnant of the Mex-ican army yet in the field, and routed the bands of guerrillas that covered the roads. We have known him to march with cavalry, over mountains impracti-cable to any feebler resolve than his, at the rate of sixty miles in a day, in pursuit of the enemy; and yet when the jaded soldier had the bare ground, without tent or blanket for his couch, not a murmur was heard, for "Old Joe" fared no better than his men. The Americans along the Rio Grande are quite confident that this movement will be successful, as the central government is so destitute of means, that it is unable to pay the soldiers now stationed along the frontier, and they are consequently very much dissatisfied. It is believed that a large number of the Government troops will join the standard of Carabajal as soon as it is displayed on the west bank of the Rio Grande. Many of the merchants on this side of the river are willing to aid the revolutionary party, as they have suffered severely from the impositions of the Mexican Customhouse officers. The trade of Brownsville, Roma, and of most of the towns on the east bank of the Rio Grande, has lately been almost ruined by the Mexican revenue officers, who have endeavored, by the most tyrannical impositions, to prevent Americans from trading with any of the towns or settlements in the interior.

I felt myself carried onward upon the backs of several animals, that in the dense drove ran close together. These, frightened at their strange burden, bellowed loudly, and dashed on to the front.

A sudden thought struck me, and fixing on that which was most under me. I dropped my legs astride of him, embracing his hump, and clutching the long woolly hair that grew upon his neck. The animal routed with extreme terror and soon headed the band. This was exactly what I wanted; and on we went over the prairie, the bull running at top speed, believing, no doubt, that he had a panther or a catamount between his shoulders. Supposed Arson.-We notice that the Commis sioners of the Town of Wilmington offer a reward of \$500 for the discovery or apprehension of the person or persons who set fire to the Store on Front Street, below the Rail Road, lately occupied by Mr. James Parker. We were not before aware that the fire of last Thursday morning had been attributed to an incendiary; we had supposed that it was accidental. Gold Discoveries,

This must certainly be a new edition of the Golden age that the poets talk about, revised and enlarged, with the latest improvements and additions; at any ing found -- but "there is a good time coming." and now perhaps, since the subdivision of our gold coinage into dollar pieces, even an editor may be privileged to see, and even at times to own a small portion of the vellow dross.

The latest discovery is reported by recent arrivals from Europe as having been made at Bathhurst, in Of course, it has created a great excitement, which will, no doubt, subside into nothing before long .--Take the world over, and there is no mining so unposits it is found in such minute particles, and so intimately combined with other substances, that it 000 in gold. costs about as much as it comes to to get it. Outside of California, and perhaps the Ural mines in Asiatic Russia, there are no gold mines that pay a fair profit for the working of them. There is gold in almost every bushel of earth in many of the western counties of this State. A bushel of dirt can be dug up out of the streets of the village of Charlotte, and perhaps 20 cents worth of gold got out of it, but at a cost of three or four times the amount. Some mining companies in Western North Carolina bave age for every dollar of gold obtained since the commencement of gold mining in this State, a dollar and a half has not been expended in labor or otherwise.

The mere discovery of gold in any place is no sign of its wealth, or even that gold mining can be made a business. Where the gold is found in large pieces its continuance is generally precarious. Where it is found in vein, other things besides the mere existence of the vein must be taken into account, as, for instance, the facilities for grinding and washing the ores, and its amount of yield per bushel, as well as the width and quality of the vein. As a general thing, ore yielding less then seventy it is go-aheadism, and when that spirit is awakened, cents to a dollar a bushel, cannot be advantageously they are willing to enter a fair field and ask no famined even in North Carolina.

BIG TURTLE .- Is a Turtle -- we don't mean a turtle-dove. but one of the fellows with shells on their backs that people make into soup-is it a shell-fish, or a reptile, or an amphibious animal, or a quadruped, or what is it? It's good to eat-says a negro boy, and that is all we know about it-save and except that, evening before last, we saw a big fellow on the payement before the Carolina Hotel, and he was a very big fellow, and came from the sound, and belonged to the Free Dust party, for he rolled in the dust, and didn't say a word. There is no news, consequently we have talked turtle, if not turkey. So

James Fentimore Cooper. The distinguished American novelist, James Fenimore Cooper, died at his residence in Cooperstown, New York, on Sunday, the 14th of September, aged 62 years, all but one day, having been born on the The steamship Illinois, from Chagres for New 15th of September, 1789. He was a native of Burlington, N. J., where his father, Judge Cooper resided part of the time at that period, his attention being divided between his residence in Burlington and his new settlement in Otsego county, New York, to which he gave the name of Cooperstown, and where his family have since resided.

his family have since resided.

Mr. Cooper was educated at Yale College, where he graduated in 1806, and then entered the navy as a midshipman. In 1811 he resigned his commission and married Miss Delancey, sister of the Bishop-of Western New York. Since that period he has devoted himself to literature, his first published effort lot," "Lionel Lincoln," and "The Last of the Mohiperiod in his literary career Mr. Cooper visited Euing a popularity only second to those of Scott.— Here he published several other fictions. In 1839 appeared his "History of the Navy of the United States," the most elaborate of his works, and one which led to many controversies. It is, however, conceded to be the best Naval History we have ever had. The novels written by Mr. Cooper since his re-turn from Europe lack the spirit of his earlier efforts. Most of them are of too didactic a character, and even when writing of the sea, the prairie or the forest, he betrays an unpleasant dogmatism on social and political subjects, which robs his fictions of their charm of freshness and truth to nature. In one series of novels he became the champions of the landlords in the Anti Rent controversy in New York; in others he was the defender of high-churchism in the Episcopal Church, and in all, there was too palpable a display of the partisan defending a set of political, eligious or social tenets. But there are passages in

The Editor's Drawer of Harper's new Monthly for September has a good story, telling how a Western lawyer once addressed a jury in a murder case. "The Bible has't," said he, "Thou shall not kill!" Now, do you know, gentlemen, that if you go to hang my client, the prisoner at the bar, that you commit murder? You do, and 'no mistake'; for murder is murder, whether it is committed by twelve men in what is cal-led a box--and a 'bad box' you'll find it if you don't give a righteous verdict-for an humble individual like tlemen of the jury, you may bring the prisoner at the bar, my client, in guilty; the hangman may do his duy, but will that exhonerate you? No such thing!— You will all, individually and collectively, you will all of you be murderers." This profound argument had its effect, the writer adds: The verdict of the jury was: Not guilty, if he'll quit the State !"

In the religious or social system of all civilized nations some equivalent for the Christian Sabbath exists, and is found necessary and indispensable for the well-being of the State; and it is remarkable that the more industrious and hardworking nations are universally the strictest observers of the day. In Southern Europe the Sabbath has nothing of the unsecular in Europe the Sabbath has nothing of the unsecular in Europe the Sabbath has nothing of the unsecular in Spain, Italy, France, etc., there is little or no intermission in business except during the time of actual service at clurch. The same is true of the people of Spanish descent on the American continent. That the English and Americans do more work, to their numbers, than any other people on the face of their numbers, than any other people on the face of the carth, is indisputable, and yet it is all done within the six week days. We all know that the Spanish and Italians are by no means distinguished for energy or industry in business. Neither are the Mexicans.—Daily Journal of Saturday last.

The blades are not arranged in the ordinary manner, but two of them together, with their handles, are concealed in the blade and handle of he outer or larger one. Judge Duncan, in a recent address delivered at Clarksburg, Va., on his return as Commissioner from the great London Exhibition, thus refers to his visit "I was present on one occasion in the House of Commons, when a measure came up, which involved the whole financial policy of the government, and the state and condition of all the industrial classes. t was debated by the Prime Minister, Lord John Russell: the Chancellor of the Exchequer. But that every one present was satisfied that all had been said, on both sides, that the subject required. Yet a measure, of a similar character, in the American Congress, could not have been disposed of under six weeks' constant discussion. Were this example adopted in the American Congress and American Courts, it would be of inestima e value to the administration of government and of

THE RIGHT KIND OF A CONSUL .- A Canadian po per commenting upon the late summary massacre of Americans in Havana, says that the impression is prevalent that had a British or French man-of-war sloop-of-war Albany, and had a British or French consul been in the city, such a wholesale massacre of British subjects would not have taken place. It hen relates the following anecdote:

In 1820, two English sailors, who had committed

The instrument of death known as the garrotte is abled to look admiringly upon the character of the man who has done more to make a name for American Literature than any other of their citizens.

Neuse River Impovement.—We learn that a corps crimes against the State, such as treason or insur-rection. Probably while Santa Anna was President of the Mexican Republic, the garrote was oftener applied to victims, in the secret chambers of the Na-tional Palace, or in the main prison near the Alme-

da, than during all the othor presidencies together.

The mode of execution by the garrote, is in this wise:—The criminal is seated in a chair, the back of which rests against a post firmly set into the floor or the ground. His hands are bound to the chair, and the back of his head, with his neck bare, is placed against the post, to which, at a proper distance, is attached a circular piece of iron, or more properly a attached a circular piece of iron, or more properly a collar, an inch or two in diameter, and suf large in circumterence to clasp the neck. The col-lar—one end being fastened to the post—is then fitted close to the neck of the victim, while the other end, containing a screw, is brought to the opposite point of the post. Being here adjusted, the screw is turned, and each turn of the screw compresses the collar more tightly, till the criminal is strangled.— Nor is this all. In the centre of the collar, and directly under the chin of the victim, there is a sharp steel point or blade, which penetrates through the neck with every turn of the screw. We believe, howneck with every turn of the screw. We believe, however, that this last feature in garrote,—the sharpened point,—is not in every case used, and that, generally, the body, after death, leaves no mark or trace
whatever of blood. There is this peculiarity in the
operation of the garrote—that death by it is almost
instantaneous—quicker and more sudden than by
the guillotine even, the hangman's rope or the soldier's rifle—while it is divested of the bloody or ignominious accompaniments in executions by the last three implements of death.

"A Rose by another Name," &c.

Names do make a difference in things, no doubt. At least, most people think so, and act in accordance with the supposition. Certain defects and diseases have been rendered "quite genteel" for a time, by dint of elegant names. Even "a cold in the head"—the most provoking, vulgar, and disgus-ting disorder possible to honest people, can be quali-fied and palliated a little by calling it an "influen-sai ned and palliated a little by calling it an "influenza." We once called in upon a gentleman and his wife—the former a plain, blunt man, the latter a "genteel," affected woman—both thoroughly sick with a cold in the head. The man was taking it naturally, and hard. The woman was dressed in rather a showy, carefully-made dishabille and was clearly doing her best to make a handsome thing of her upcomfortable situation. "And hard the was a country: Incre is much said about his talsnts for war. To be sure, he performed several masterly retreats, but what's that an evidence of? Sir, it is that he was a coward." "General Washington a coward!" screamed Foster, a village doctor, in a voice of thunder. "General Washington a coward! who so base as dare say it? Wisconsin is a great State, and Gen. Henry Dodge is her greatest man, in the estimation of her citizens. 51-tf succinct, and condensed account of Mr. Columbus's life and exploits. Sir, who was Christopher Columbus. Sir, echo answers, the greatest man of his times. Sir, Columbus was the offspring of a man of the same name, who was an indigent basket-maker in a small town called Rome, situated on the river Tigers, a stream which takes its rise in the Pyranine mountains, and flows in a south-easterly course into the Gulf of Mexico. At an early age Columbus evinced a decided talent for the soa, and occupied the leisure hours of his infancy in perusing books of travel and works on navigation; it was while engaged in these pursuits that he inadvertently met with the works of Robinson and Crusoe and Captain Cook, and the definition he made from them was that far away over the trackless main, thitherto untrodden by the foot of man, was an undiscovered with a desire to discover that country which he so often saw in his youthful dreams; actuated by this desire, he petitioned the great Pontificial Pope of Rome to give him three yawls and a jolly-boat to carry out his designs. That distinguished man at first refused, but his wife Cleopatra, being pleased with a magnanimity which is a carricature of her sex, prevailed upon him to grant Columbus's request.

and transient visitors she would say she can insure them clean and comfortable Beds.

Her Table is always supplied with the best the market af-fords; and by her personal attention, assisted by faithful servants, to the comfort of her guests, she hopes to receive a liberal share of patronage.

NUNAWAY from the subscribers, on Sunday, 31st August, a negro man named IRELAND, about 28 or 30 years old;—he is about 5 feet 3 inches high, black, rather stout, bushy hair and beard, and he leans forward very much in walking. He had on an old suit of drab kersey when he went off. We purchased him from Mr. Owen Holmes about two years since. He formerly belonged to Samuel Anders, of Bladen county, and is doubtless lurking about his old neighborhood.

The above reward will be paid for his apprehension and confinement in any Jail so that we can get him.

new Livery Stables.—Fire Proof.

How ready to receive Horses at livery, by the day, reck, or month.

My Stables are situated on the corner of Princess and Third. My Stables are situated on the corner of Princess and Third Streets, directly opposite the Court-House, and very convenient to the business part of the town. They are built of brick, and covered with tin, which makes them entirely FIRK-PROOF. They are large, commodious, and well constructed; and in every respect as comfortable and convenient as any Stables in the United States

I also have (for the accommodation of Drovers,) a large and comfortable Lot, together with a basement under the Stables sufficient to hold one hundred horses, and shelter them well and comfortable.

Horses, Carriages, and Buggies, kept constantly for hire.

My Hostlers cannot be surpassed in any country, and serefore feel confident of giving entire satisfaction to thou who favor me with their custom.

I feel grateful to my friends and the public for their liberal! patronage heretofore, and hope to merit a continuance of their custom.
